

Your Name

ECE 529: Introduction to Technical Cybersecurity

Spring, 2019

Paper Title

This is standard body text. Use 12 point text, with a professional font. I'm using a Helvetica font here, but any similar font is fine. Double space the text. Yes, you should replace "Your Name" with your real name. All paragraphs should be indented, with no extra space between paragraphs. **Paper Title** above should reflect the title of the paper you are submitting, should be in bold, and should be 14 point text in the same font as the body text.

Show all figures inline and make sure they are centered, with the caption text under them. Caption text should be centered under the image. If figures are exception-

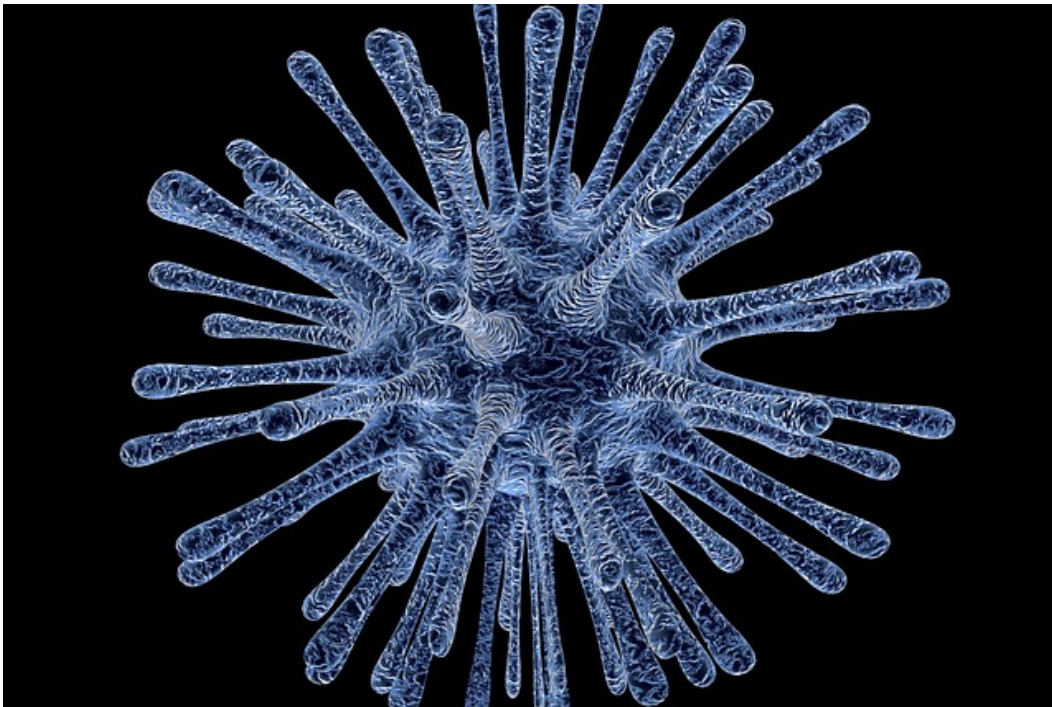

FIGURE 1: SAMPLE FIGURE SHOWING A WEIRD VIRUS.

ally large, you can include them in an appendix and cite them from within the text. Any references you use should be included in footnotes rather than a separate references section¹. Also, make sure all your pages are numbered in the bottom left corner. I prefer “page <x> of <total>” format as shown here, but if your word processor does not do this, just a page number is fine. All text should be justified. I will not be that concerned about margin spaces, but something like an inch should be appropriate.

¹ This is where you would put a footnote reference.
