ECE 529 - Introduction to Technical Cybersecurity | How to use this course

Module Summary

- Read the **Syllabus**
- Send me a **Course Message**
- **Introduce yourself** in the **Discussion section**
- Practice using **Web Conferencing** tool
- Complete **Welcome Survey**

Below you will find a list of orientation activities to complete as a part of our first module. These activities are designed to give you a chance to get to know our online environment, as well as your fellow classmates. You'll be asked to complete simple tasks using the tools that we'll be using throughout the semester.

Refer to the information in the grey wells for some tips regarding UNM Learn.

Heads up! Click on the `Info` for more information on how to perform these actions.

Navigating the Course

Enjoy exploring our course site in UNM Learn. Be sure to schedule enough time to read the resources prior to beginning our first module.

The **left-hand column (1)** of this course is the course menu. It is persistent but can be hidden by clicking on the sidebar border. You can return to main page by clicking on the **Course Home** link at the top left of the page. You can also use it to access the **All Modules** page.

In each module you will find a sub-sidebar that lists the **Table of Contents** for the module. It looks something like screenshot **(2)**.

There are many other resources and pages in the **How to use Learn** page (3), so if you find yourself lost, you can always go to that page from the link on the top left side bar and use the **Quick Help Screen Shots & Video** column. If you still need help use the **Create a Support Ticket** to get technical help from the Learn support team.

On each page you can skip forward or backward by clicking on the icons in the bar.

On some pages you would need to lunch the elements by clicking on the **Click to Launch** button (1).

You can also use the arrows to move within the table of contents (2). If you find that you cannot continue forward, it means you have reached the end of the lesson and need to choose the next one from the list on the left.

Activities

1. Send me a course message.

Let me know you have begun the course. This would be the best time to ask questions about the syllabus, format of the course or any other concerns.

Use the **Course Messages** tool:

Messages do not leave the course, but you do have a "My Messages" module on the Course Portal page to announce new messages.

Click **To** to select your recipient(s)

2. Participate in the introduction discussion.

Please refer to the Netiquette (network etiquette) guidelines to keep this online class a positive learning environment for everyone.

3. Prepare for your Web Conferences.

- We will be using ZOOM
- Contact **Learn Tech Support** for troubleshooting or questions: **505.277.0857 Toll Free 1.877.688.8817 or Create a Support Ticket**

4. Complete your introductory assignment.

Assignment details: Please complete the Course Tour activity (linked to the left on the Table of Contents). Course Tour due at the end of the first week.

5. About you

- Complete the **Welcome Survey** in the *Table of Contents*.
- Add your photo ("avatar") to your Learn profile. This image will appear next to your Discussion Posts and above the Global Navigation Menu at the upper right corner of the My Learn screen.

6. Download and install CaptureSpace Lite

This guide provides information about how to use Kaltura's CaptureSpace Lite.
