ASSIGNMENT INFORMATION

Due Date	Points Possible
Monday, October 11, 2021	**1.5**
11:59 PM	View Rubric

Use the structure learned in this module to write a paper that presents the Support Vector Machines for classification.

Paper contents

The paper must contain the experiments that you completed in Module 3, and also the theory that was summarized in that module. The paper should have a length between 4 and 8 pages plus the references. Use the rubric provided with this homework to self assess your work.

Paper format

The paper has to be in a standard IEEE format. The use of LaTex is highly recommended for paper presentation, but any text editor is acceptable if the product meets the standard IEEE style.

If you are not familiar with the IEEE style, please go to the IEEE Author Center and take a look to the "Transactions Instructions Only" document (or take a look to any paper). The Word and LaTex templates are in that page too.

By submitting this paper, you agree: (1) that you are submitting your paper to be used and stored as part of the SafeAssign™ services in accordance with the Blackboard Privacy Policy; (2) that your institution may use your paper in accordance with your institution's policies; and (3) that your use of SafeAssign will be without recourse against Blackboard Inc. and its affiliates.

Institution Release Statement

By submitting this assignment, you agree that you understand UNM's Academic Dishonesty policy in The Pathfinder (UNM Student Handbook).
